

A Major Leap in Electronic Operations

Bonded Goods Write-off System in Operation

As of July 1, 2007, the Bonded Goods Write-off System was completed, and all application processes previously done on paper will now take place online. This system integrates the STSP Administration, Customs, and industry into one unified service platform to simplify application procedures, lower human resource costs, decrease processing time, and enhance service efficiency.

Customs e-Service System Now Online

To provide STSP enterprises, storage and transportation agencies, the postal service, and customs brokers with a more efficient 3-in-1 application channel for processing visas, warehousing, and declarations, the Customs e-Service System was completed in July 2007. Officially online on December 12, the System provides automated application, examination, management, and Customs clearance services, and is linked to the Bureau of Foreign Trade's Facile Trade Net (FTNet). The electronic application process has reduced the Customs clearance processing period from an average of 20 minutes to just seven minutes; it is also equipped with offsite back-up and emergency response capabilities to prevent overstocking, and to reduce Customs' processing time.

Science Park Customs e-Service System is officially online (Dec. 12)

Major Reworking of STSP Homepage

- The STSP German and Spanish websites are now available for more internationalized service.
- The menu was rearranged laterally on the left side of the homepage to facilitate data itemization and expansion, easy maneuvering, and accessibility.
- A picture and caption section was added to the Latest News section to enrich homepage layout.
- A "Map of STSP Life" was added to the "Park Life" section to provide more convenient access to related facilities.
- New TSP and KSP maps incorporating public highway, railway, the Taiwan High Speed Rail, and airport locations were linked to the Chinese, English, and Japanese STSP homepages for a clearer presentation of STSP-area transportation.
- A Mobile Barcode encoding the STSP PDA website link and a STSP Administration speed-dial function was posted to the lower left-hand corner of the STSP Chinese homepage as well as on the back cover of the STSP Newsletter.

Public Wireless Internet Access

Beginning on December 27, 2007, STSP employees will be able to apply for Internet access cards that would allow them to utilize the wireless Internet connection now available on floors 1-3 of the Administration Building, at the Central Plaza, the Silaya Plaza, the Hua Yuan Singles Dormitory Plaza, the Pu Hsing Family Dormitory Plaza, the Siake Lake Gallery, Yingsi Lake, the Commercial and Industrial Services Center employee restaurant (first floor), the KSP Singles Dormitory first-floor entrance hall and reading room, as well as in all HSP public areas.

Wherever you see this sign—free wireless!

Hello! These symbols denote free-wireless Internet service zones (TSP)
